

- SUPPLIES NEEDED**
- 3 1/4 YARDS OF 54" WIDE FABRIC
 - SHARP SCISSORS
 - REMOVABLE MARKING MEDIUM (chalk, wax, tailor's tack, etc.)
 - 1 - 26" NON-SEPARATING ZIPPER
 - THREAD
 - SEWING MACHINE
 - IRON
 - 1/2 YARD OF THINNER POCKET FABRIC
 - FUSIBLE INTERFACING

CUTTING INSTRUCTIONS

1. Print pattern. Use paper (the document filed on sheets of standard size paper and tape the pieces together, or print on a wide format printer (36" or wider). Print sheets offer this service for approximately \$12. If available to you, the BDN recommends wide format printing.
2. Once your pattern is printed, cut along the outermost rectangle to remove any excess paper. The template should then only use a 1/4" thick or larger piece of fabric that has been folded in half. If your fabric is less than 54" wide use **NOTE A**. For maximum yield the pattern is laid out for fabric that does not have a direction. For fabric with a grain, such as velvet or cashmere or fabric with a clear directional grain use **NOTE B**.
3. Fold your fabric in half along the lengthwise grain matching selvage edge to selvage edge. Schedule in the self-finished edge of fabric. This corner marks the fabric from corresponding facing. Other lines on edge that resembles any fraying, though not as frequently, a clearly finished line will be found. Around this edge in your cut pieces in the pattern frequently differs from the main body of the fabric.
4. Place the paper template on top your fabric, matching the folded edge of the fabric with the side of the paper marked "folded edge".
5. Place pins throughout the template pinning together both layers of fabric as well as the paper.
6. Cut around the perimeter of each piece.
7. Leaving the pins in place, you will need need to strip each of the notches, taking care to not strip beyond the end of the fabric!

NOTE A: FABRIC LESS THAN 54" WIDE
 If your fabric is less than 54" wide we will need to cut and measure more than once. Use the outer template and inner template to cut the fabric. The outer template is for the main body of the jumpsuit. The inner template is for the pocket. The pieces are marked with a grain direction. To cut the fabric, you will need to cut the fabric in half along the lengthwise grain matching selvage edge to selvage edge. Schedule in the self-finished edge of fabric. This corner marks the fabric from corresponding facing. Other lines on edge that resembles any fraying, though not as frequently, a clearly finished line will be found. Around this edge in your cut pieces in the pattern frequently differs from the main body of the fabric.

NOTE B: FABRIC WITH NAP OR DIRECTIONAL PATTERN
 If your fabric has a nap or a directional pattern, then you will need to cut the fabric in half along the lengthwise grain matching selvage edge to selvage edge. Schedule in the self-finished edge of fabric. This corner marks the fabric from corresponding facing. Other lines on edge that resembles any fraying, though not as frequently, a clearly finished line will be found. Around this edge in your cut pieces in the pattern frequently differs from the main body of the fabric.

NOTE C: USING FUSIBLE INTERFACING
 Fusible interfacing is needed in the neck, chest, and waist areas. While the use of fusible interfacing is optional, the BDN does not recommend its use. If you do use it, please refer to the instructions for the use of fusible interfacing in the instructions of the BDN.

Size Mike Front Pocket Cut 2 Pocketing*

*or cut 2 self

Before cutting your fabric measure this square to make sure that the pattern is scaled correctly!
 *The primary and reference will automatically scale large scale images which will affect the fit.
 The inner square should measure 4" x 4"
 The outer square should measure 12cm x 12cm
